PROJECTS

WORKOUT TRACKER WEB APPLICATION
Java, Spring Boot, React, TypeScript, PostgreSQL, Docker, GitHub Actions, Flyway, JUnit Aug 2026 – Present

- Built a full-stack workout tracker supporting strength and cardio logging, reusable workout templates, training goals, and progress analytics.
- Designed a layered REST API with DTO validation, centralized exception handling, and Spring Data JPA; modeled PostgreSQL relationships and managed schema migrations with Flyway.
- Implemented Spring Security sessions, BCrypt hashing, email verification, password recovery, and per-user data access; tested backend and frontend workflows with JUnit, MockMvc, Mockito, and Vitest.
- Containerized the frontend and backend and built GitHub Actions workflows for automated testing, versioned image publishing, and approval-gated VPS deployment with health checks and rollback.

AB DRYWALL SYSTEMS LLC WEBSITE
React, JavaScript, HTML/CSS, React Router, Vite, Nginx, DigitalOcean, SEO Jan 2026 – Present

- Built and deployed a responsive production website for a Dallas-Fort Worth construction company using React, React Router, JavaScript, and Vite.
- Developed interactive project galleries with responsive image layouts, keyboard-accessible controls, lazy-loaded WebP assets, and reusable content-driven components.
- Implemented technical SEO with route-specific metadata, canonical URLs, social sharing metadata, JSON-LD structured data, robots directives, and sitemap support.
- Configured an Ubuntu VPS with Nginx and HTTPS, including canonical redirects, direct-route handling, custom 404 behavior, and production caching policies.

PORTFOLIO WEBSITE - rogerbelman.com
React, JavaScript, React Router, Vite, GitHub Actions, Nginx, DigitalOcean, Ubuntu Dec 2024 – Present

- Built a responsive React portfolio hosted on DigitalOcean with Nginx and HTTPS; automated validation, builds, and approval-gated deployment using GitHub Actions CI/CD.
